

EMAIL SUBJECT: **An Easy Step to Boost Our Childrens' Education**

Hello friend,

Technology is a crucial learning resource in today's classrooms. We not only use the internet for homework and instruction, but devices such as Google Chromebooks and Apple iPads have become a common sight in classrooms and hallways.

Unfortunately, there are a lot of variables when it comes to school budgets and education funding. The latest technology isn't a guarantee. It's neither cheap nor easy to get to every student and school district that needs it.

Arvig® realizes this challenge and has stepped in to help fill the gap. Since 2010, Arvig has [donated more than \\$1M](#) to local schools through their School Partnership Program. The program gives extra cash to schools like ours, to buy supplies—especially technology—to improve the educational experience.

If you're an Arvig internet customer, you can elect to have \$1 of your monthly payment donated to a school of your choice—there's NO extra cost to you. You just simply [choose a school](#) in the Arvig service area.

We would like to extend a sincere thank you to everyone who currently participates. 😊

Best regards,
{School District signature}

If you are currently participating in this program, you do not need to sign up again. Limited to schools within the Arvig service area; some restrictions apply.
